

REVLAR™

Waterproof, durable, tear-resistant laser paper for a wide range of applications

Ideally suited for use anytime printed materials will be subject to frequent handling or extreme environmental conditions, REVLAR laser paper is tear-resistant and durable, as well as impervious to grease and chemicals, and designed to withstand high and low temperature fluctuations.

Laser-compatible REVLAR combines the image quality and printability of standard paper with a durability and resilience unmatched by any other product. It can be folded, punched or die cut as needed, making it valuable for literally thousands of applications in a range of industries—including hospitality, retail, education, manufacturing, healthcare and government.

- Hanging signs/banners
- Point-of-purchase displays
- Restaurant menus
- Placemats
- Temporary license plates
- Parking tickets
- Military field manuals
- Medical charts
- Runner's bib
- Trail maps
- Golf score cards
- Construction signage
- Crate/pallet tags

REVLAR™ is available in various weights, sizes and colors.

Handling and Storage

Since REVLAR waterproof laser paper is made from a synthetic material, there are a few special storage and handling requirements.

- Allow sheets to acclimate in the room in which they will be processed for approximately 24 hours before processing. Ensure that the cartons are opened and any shrinkwrap is removed.
- Fan sheets gently before placing in the feeder drawer.
- Always handle sheets by the edges to prevent fingerprints and scratching.
- Do not guillotine trim sheets prior to imaging; this can cause misfeeds.
- Store product in original packaging between uses.

Note: Static build-up may occur during long runs; this may interfere with the running/stacking of media. In addition, minimal side-to-side color shifts may be visible when auto duplexing.

Features and Benefits

- **Durable, tear resistant and waterproof**
 - Withstands rain, heat and temperature variations; deters grease, solvent and chemicals; will not tear or fade
 - Ideal in a range of applications, from restaurant menus to military field manuals to parking tickets
- **Superior laser image quality**
 - The appearance, smoothness and printability of standard paper
 - Works in any standard laser printer
- **Cost-effective**
 - Long-lasting materials save on replacement costs
 - More affordable –and faster– than lamination

Specifications

White

504	3.7 Mil White	Available in 8.5" x 11", 12" x 18", IGen3 (20.5" x 14.33")
505	4.7 Mil White	Available in 8.5" x 11", 11" x 17", 12" x 18", IGen3 (20.5" x 14.33")

Valuable for thousands of applications in a range of industries – including hospitality, retail, education, manufacturing, healthcare and government.

Recycling
 REVLAR has special aqueous surface coatings designed to optimize print performance, which make it a Number 7, or Miscellaneous Plastic. The acceptance of this type of plastic for recycling varies, so it is important to check local authority guidelines. When recycled, number 7 plastics are typically used in "lumber" and custom-made materials.

REVLAR can be incinerated safely as a potential source of energy, but should be incinerated according to local regulations.

As an inert material, REVLAR can also be buried in approved landfill facilities.

About Relyco
 Relyco is the leading provider of business forms, laser & digital print solutions, checks, and pressure seal checks & forms. Understanding and meeting our clients' needs is always our first priority. www.relyco.com.
