RELYCO[®]
BUSINESS PRINTING SOLUTIONS

What is ULTRASEAL?

ULTRASEAL® is Relyco's revolutionary pressure seal solution offering businesses and marketers a cost-effective and environmentally efficient way to create, process and deliver mailed pieces without an envelope. ULTRASEAL forms can also be custom printed in today's office laser printers, complete with postage, allowing for control of costs, personalized designs and either bulk or one-off delivery of mailed pieces when necessary.

By eliminating the printed envelope from the process, Relyco's ULTRASEAL has become the more efficient and "green" alternative when doing office mailings. Folding, stuffing, gluing and heating of mailings and envelopes are things of the past. ULTRASEAL from Relyco is the future.

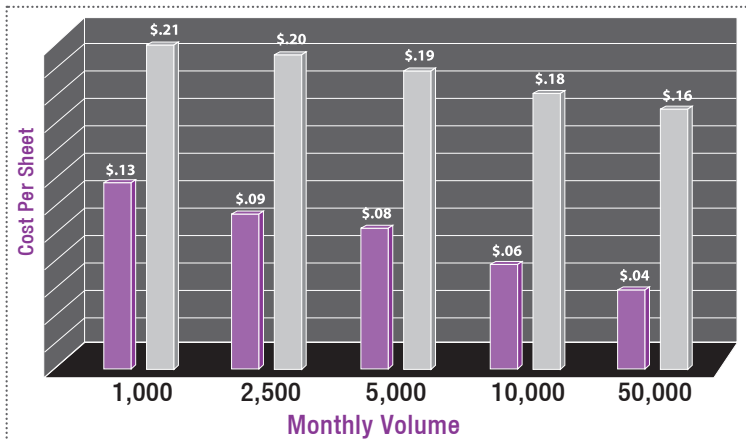

Advantages of ULTRASEAL

Once you print the ULTRASEAL mailing piece in your color or black and white laser printer, the forms can be fed into any one of the Formax™ pressure seal machines available from Relyco. These machines take care of all the folding and sealing, utilizing pressure that activates the special paper coating. The machine completely seals the edges of the piece to create the ready-for-mail document.

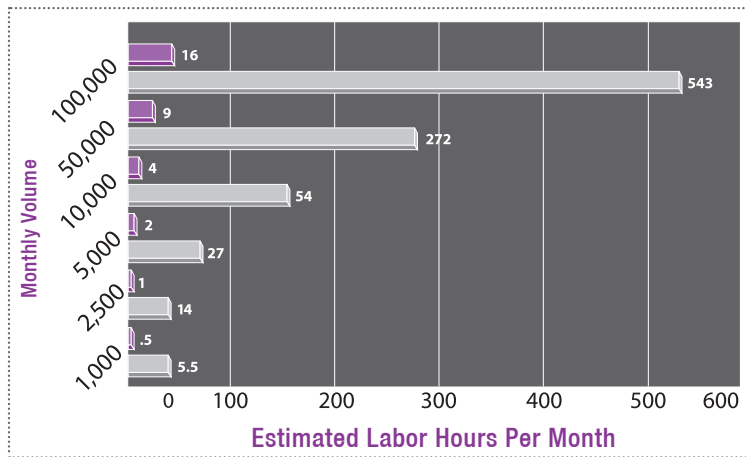

How ULTRASEAL reduces costs

Taking on any office process transformation can, at first, seem costly and time consuming. However, pressure seal is the easiest and most affordable implementation you will ever make. The savings in both time and money compared to manual processing is easily calculated. The graphs below illustrate exactly what can be gained.

ULTRASEAL VS. Manual Processing

ULTRASEAL can reduce your overall mail processing costs by nearly 50%.

Manual
ULTRASEAL

ULTRASEAL can reduce your labor hours by leaving time for other revenue-generating projects.

“It was much faster and easier than we ever expected.”

Willie Carlisle
Alabama State University 

Features & Benefits

No water, glue, heat or envelopes needed!

Reduce:

- Processing Time
- Material Costs
- Labor Costs

Eliminate:

- Unbalanced Inventories
- Hand Folding
- Envelopes & Envelope Stuffing

ULTRASEAL is the most efficient way to deliver:

- Paychecks
- Invoices
- Tax Forms
- Utility Bills
- Medical Bills
- Statements
- Grade Reports
- Test Results
- Medical Reports
- Collection Notices
- PIN Notifications
- Bank Documents
- Jury Notifications
- Sale Notifications

ULTRASEAL check stock

With ULTRASEAL pressure seal checks, you can feel confident knowing that your highly sensitive information is secure. Through fraudulent techniques like chemical washes, toner lift-off, photocopying, and stolen account information, businesses lose billions of dollars each year. Over a million checks a day are forged in the U.S. and most go undetected for over a year. Designed with this in mind, our pressure seal checks offer up to 13 different security features to protect your business from becoming a victim of check fraud; insuring that you are in full compliance with ANSI Standards.

Custom ULTRASEAL

Relyco can create totally customized ULTRASEAL forms that meet the needs of any organization. Whether it's to incorporate and highlight your organization's brand, distinguish yourself with full color, or create a specific design to meet a work flow requirement, Relyco can help you maximize the advantages and efficiency gained by ULTRASEAL.

ULTRASEAL tax forms

Tax time is only once a year, but processing W-2s or 1099s can be a time-consuming endeavor. Using pressure seal to process tax forms is a great way to get an instant return on your pressure seal investment. Relyco has pressure seal layouts for all business tax forms. Our annual tax form catalog, which details the current year's product selection, is available every August.

Autoseal equipment for ULTRASEAL

For over 10 years, Relyco has carried the Formax™ Autoseal® line of pressure seal equipment. The Autoseal line of machines for Relyco's ULTRASEAL forms are the most durable and dependable machines on the market today. They range in handling capacity to match any business need, from a few hundred forms per month to hundreds of thousands.

How ULTRASEAL equipment works

1 After printing, load the ULTRASEAL forms into the folder/sealer's input tray.

Press **START**.

2 Folding the form aligns patterns of a specially formulated cohesive, which has been pre-applied to the document during manufacturing.

Once folded, the document travels through a series of sealing rollers inside the folder/sealer.

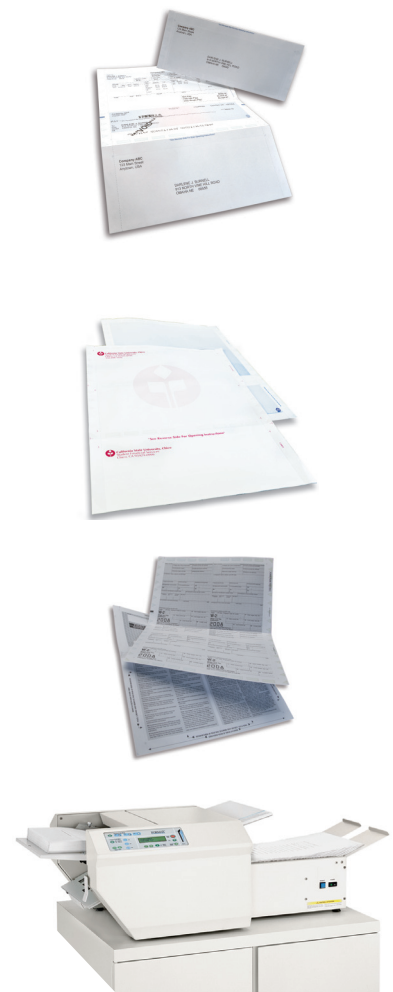

3 These rollers apply a great amount of pressure to the form, which activates the cohesive and, in turn, creates a secure "fiber tear" seal.

ULTRASEAL forms come out folded, sealed and ready for delivery!

On-site service and installation available for all folder/sealers
