

Features and Benefits

- Prints on a standard laser printer
 - Available in a standard 8 ½" x 11" size; no need for special printer trays
- Prints laser identification bracelet and labels on a single sheet
 - Identification bracelet and 20 labels can be imaged and bar coded simultaneously
 - Ensures accuracy; meets security and confidentiality requirements
- Large image space
 - Allows for printing of large fonts and bar codes for improved patient identification
- Prints with a clear film overlay
 - Protects imaged information and provides a moisture barrier
- Size flexibility
 - Ensures that LaserBand will fit small, medium and large wrists

LaserBand offers a solution to solve patient identification needs of any healthcare facility.

LaserBand®

Self-laminating, laser-printer generated patient ID bracelets

Ideally suited to hospitals and medical clinics, **LaserBand** ID Wristbands are self-laminating and laser-printer generated, with integrated admission labels printed on a single sheet.

Many of the identification systems used in hospitals today are outdated, require time-consuming processes and require special equipment. **LaserBand** utilizes laser printers that are already in place. In one simple step, facilities can produce a wristband with:

- Crisp, easy-to-read fonts
- Clean barcodes in any format
- Attention-grabbing colors
- Unquestionable black-and-white or color patient photos

LaserBand is available in two options—the **Original LaserBand** and **LaserBand2**—with a range of wristband/label combinations to meet the unique requirements of your healthcare organization.

With a wide variety of laser identification wristbands, labels and wristband/label combinations for patients from infants to adults, **Original LaserBand** offers a solution to solve patient identification needs of any healthcare facility.

LaserBand2 is an advanced line of laser identification wristband, label and wristband/label combination products designed to accommodate the special requirements of your healthcare organization.

The **LaserBand** wristband was invented to conveniently address a variety of issues faced by healthcare administrators with a single, inexpensive laser printing solution. Over the last couple of decades, there have been many factors complicating the previously simple task of patient identification, including:

- **Risk Management** – the need to avoid treatment, laboratory and medication errors caused by mistakes in patient identification. According to a 1999 report by the Institute of Medicine, medical errors are the 8th leading cause of death for Americans, more than motor vehicle accidents, breast cancer or AIDS.

- **Patient Care** – public and governmental pressure to improve the quality of patient care. A 2001 report from the American Hospital Association reports for every hour of patient care, doctors spend an additional 30 to 60 minutes on paperwork.
- **Economy** – the desire to maintain and reduce costs. Since the **LaserBand** solution utilizes equipment that is already in place, the only expense is consumables. All other costs are immediately eliminated.
- **Technology** – continued advancements in complex systems for patient care and records management. Bar coding alone can make matching patients with lab specimens, procedures or prescriptions completely free of human error.
- **Simplicity** – increased demand for a simple yet highly accurate method of identifying and coding patients. **LaserBand**, being an all-in-one solution, fulfills this need with the simplest of systems.
- **Process Improvement** – continued need to improve processes and efficiencies overall. **LaserBand** can help hospitals improve internal processes by leveraging the power of information.

About Relyco

Relyco is the leading provider of business forms, laser & digital print solutions, checks, and pressure seal checks & forms. Understanding and meeting our clients' needs is always our first priority. www.relyco.com.

Ordering Information

Relyco offers stock LaserBand wristbands in quantities as low as 1,000; custom formats/configurations are also available. For more information or to request a sample, call your Relyco representative at 1-800-777-7359 or visit us online at www.relyco.com.
