

ULTRASEAL[®] Pressure Seal Check Solutions

Improve Efficiency and Increase the Security of Sensitive Information by Eliminating the Envelope

The Future in Checking is Here

Our ULTRASEAL pressure seal checks make envelopes a thing of the past. With a unique one-piece design that offers up to 13 built-in security features, we have created a check solution that is lean, mean, and green. ULTRASEAL pressure seal checks by Relyco are the future – providing your business with the perfect solution for the secure distribution of sensitive information.

No Water, Glue, Heat, or Envelopes Needed

Unlike other types of mailers that require glue, heat, or water to seal them, our printer-compatible ULTRASEAL pressure seal checks have narrow bands of pressure-sensitive adhesive. Once you print the pressure seal mailing piece in your color or black and white laser printer, the forms can then be fed into any one of the Formax™ pressure seal machines available from Relyco. These machines take care of all the folding and sealing, utilizing pressure that activates the special paper coating. The machine completely seals the edges of the piece to create a secure, ready-for-mail document that delivers peace of mind.

The ULTRASEAL pressure seal process from Relyco is faster and cleaner than any other self mailing product on the market, making it the most cost and environmentally efficient way to create, process, and deliver mailed pieces without an envelope. By eliminating the printed envelope from the process, ULTRASEAL has become the more efficient and “green” alternative when doing business mailings.

Where Ultra Sensitive Information Meets Ultra Security

With ULTRASEAL pressure seal checks, you can feel confident knowing that your highly sensitive information is secure. Through fraudulent techniques like chemical washes, toner lift-off, photocopying, and stolen account information, businesses lose billions of dollars each year. Over a million checks a day are forged in the U.S. and most go undetected for over a year. Designed with this in mind, our pressure seal checks offer up to 13 different security features to protect your business from becoming a victim of check fraud; insuring that you are in full compliance with ANSI Standards.

Savings You Can Take to the Bank

Taking on any office process transformation can seem costly and time consuming at first, yet with pressure seal, savings of time and money can be realized immediately. By eliminating labor intensive activities like folding, stuffing, and sealing, our pressure seal solutions can reduce your overall mail processing costs by nearly 50%. Relyco's ULTRASEAL pressure seal solutions leave you with time to focus on revenue-generating projects. In addition, Relyco's ULTRASEAL pressure seal solutions meet all postal regulations, allowing you to incorporate automation features which can further reduce the cost of document processing and mailing.

Benefits

- Immediate material cost savings by eliminating unbalanced inventories and envelopes
- Reduced processing time and labor costs by eliminating hand-folding and envelope stuffing
- Environmentally-friendly process makes pressure seal the “green” alternative for office mailings
- Greater accuracy and fewer errors with improved efficiencies and streamlined processing
- Enhanced security is ideal for sensitive documents

ULTRASEAL pressure seal solutions can reduce your overall mail processing costs by nearly 50%
