## How are Premium Colors used?

### What can you make with it?

- Eye-catching signage
- Advertisements
- Important flyers
- Product tags
- Document dividers
- Marketing collateral
- Special event menus
- Brochures

### Specifications

- Standard size: 8.5" x 11"
- Thickness: 5 mil (172 gsm)
- Melting point: 450°+ Fahrenheit
- Solid core polyester
- Classified as a #1 plastic  
*Can be recycled as a plastic, not as a paper. Check with your local recycling services for your options.*

### Features & benefits

- **Super durable material** - perfect for frequent handling, wet surroundings or extreme conditions
- **Eliminate the need to flood coat a white sheet** - save toner, time and resources
- **No fading** - colors can last for up to a year with exposure to UV rays
- **White toner compatible** - enhance images and text for more impact
- **Deluxe coating** - for superior printability and static resistance
- **Long-lasting solution** - more affordable, faster and more durable than laminated materials
- **Versatile material** - options to score, punch or die-cut
- **Laser printer compatible** - tested to run on all brand name laser printers  
*Also compatible with offset and flexo printers. (Inkjet and HP Indigo compatible REVLAR is available upon request.)*
