Specifications

- Opacity: 90%
- Brightness: 93%
- Melting point: 302°+ Fahrenheit
- Polyolefin matte white material
- Classified as a #7 plastic
Can be recycled as a plastic, not as a paper. Check with your local recycling services for your options.

Features & benefits

- **Super durable material** - perfect for frequent handling, wet surroundings or extreme conditions
- **Competitive** - unique polyolefin material makes REVLAR Soft more cost-effective than polyester synthetics
- **Pliable, flexible, hand-foldable** - eliminate scoring if you prefer to fold by hand
- **Soft & silky to the touch** - serves as a conversation starter and distinct tactile experience
- **Most writable synthetic** - write or stamp on this material, just like paper
- **Broader production printer options** - polyolefin core has lower gsm (weight) than polyester synthetic papers
- **Long-lasting solution** - more affordable, faster and more durable than laminated materials
- **Versatile material** - options to score, punch or die-cut
- **Compatible with laser production printers**, offset printers and flexo printers
(Inkjet and HP Indigo compatible REVLAR is available upon request.)
