

FUTURACHEK® High Security Laser Checks

Features

- Attractive, custom pantograph conceals a copy-void safety feature
- Several high-end security features not found together on other lines
- 3-2/3" checks with check on top or bottom
- Multiple layouts with optional stub perforation on four layouts to assist in hand-folding

Premium Laser Checks Featuring 15 Security Features and Custom Pantograph

The FUTURACHEK® line of laser check stock offers 15 security features, and includes an attractive, custom pantograph available in two color formats. Printed on premium safety paper, the FUTURACHEK line offers several high-end security features not found together on other lines – Enhanced Toner Adhesion, Covert Fluorescent Fibers which can be seen only with a UV light, Solvent Reactive Color Spotting, and a Multi-Language Chemical Void. These features make it extremely difficult to alter the checks using a “chemical wash” – one of the most commonly used techniques for removing toner from a document. When exposed to chemicals or solvents, the specially manufactured paper reacts by creating dark, indelible stains, or the word “Void” in six different languages.

FUTURACHEK® High Security Laser Checks			
	Part No.	Size	Check Size/Position
	FC302	8-1/2"x11" 1 Perforation 3-2/3"	3-2/3" Bottom Check
	FC302P	8-1/2"x11" 2 Perforations at every 3-2/3"	3-2/3" Bottom Check
	FC302II	8-1/2"x11" 1 Perforation 3-2/3"	3-2/3" Bottom Check
	FC302PII	8-1/2"x11" 2 Perforations at every 3-2/3"	3-2/3" Bottom Check

Microperforation allows for clean, easy tear

Copy-Void when check is photocopied the word VOID appears

Voidless Postal Window where copy-voice is removed for increased postal compatibility

Microprinting is too small to be photocopied

Clear Band allows for accurate MICR reading

Gradient Screen two color blend makes it difficult for copiers to match

Image Friendly convenience amount area to meet Check 21 Compliance regulations

Padlock Security check protection system to alert tellers of security features. The back of the check details features for the tellers

By printing the back of this stub portion with **NON-NEGOTIABLE**, it helps prevent fraudulent use of the blank portion of the form.

Image friendly, absorption security features: varying bond, copy-void safety, microprinting, diagonal and spine lines, simulated watermark, iridescent fibers, color fibers and more advanced.

Endorsement Warning above endorsement alerts the teller and/or the recipient to the presence of security features which can be verified before processing the check.

Microprinting of the endorsement line to verify the authenticity of the document.

Copy/Void safety feature in **Endorsement Backer** helps prevent copying of signatures.

Simulated Watermark safety feature, visible when viewed at 45° angle, is coin-reactive and can not be easily photocopied and scanned.

Anti-Splice Backer diagonal words of varying sizes make it difficult to alter information by the cut-and-paste method.

WARNING: THE BACK OF THIS CHECK CONTAINS A SIMULATED WATERMARK. HOLD AT 45° ANGLE TO VIEW.
DO NOT WRITE, STAMP OR SIGN BELOW THIS LINE.
