

# TRIDURA Hybrid Paper (PaperTyger®)

*TRIDURA is ideal for customers who are looking for something that is more durable than standard paper but do not need all the advantages of a full synthetic durable paper product.*

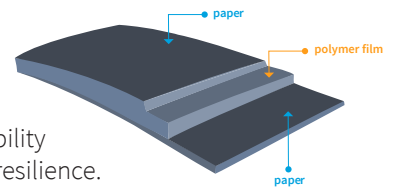

## How is TRIDURA Hybrid Paper used?

### What can you make with it?

- Take-out menus
- Placemats
- Parking tickets
- Manuals
- Medical charts
- Trail maps / city guides
- Point-of-purchase displays
- Permits / certificates
- Golf score cards
- Postcards
- Maps / charts
- Bookmarks

### The anatomy of TRIDURA

TRIDURA has a polymer film core sandwiched between layers of paper. With its unique construction of paper/polymer/paper, TRIDURA combines the image quality, foldability and printability of standard paper with unmatched durability and resilience.

### Features & benefits

- **Durability** - the synthetic core means that TRIDURA is tear-resistant and tough, making it perfect for when you want a durable paper, but don't need all of the other characteristics of a full synthetic paper
- **Environmentally aware** - white paper layers made of FSC certified papers
- **Superior folding and image quality** - the appearance, smoothness and printability of standard paper that folds well in either direction and holds a tight fold
- **Compatibility** - laser printers, inkjet printers, HP Indigo printers, offset printers and flexo printers

LASER COMPATIBLE

INKJET COMPATIBLE

HP INDIGO COMPATIBLE

OFFSET COMPATIBLE

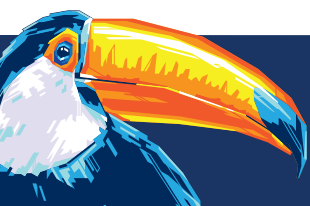

FLEXO COMPATIBLE

### Handling & Storage

Since TRIDURA is paper with a synthetic core, there are a few special storage and handling requirements.

- Allow sheets to acclimate in the room in which they will be processed for approximately 24 hours before processing. The optimum environmental balance for paper is 74°F / 23°C and 50% relative humidity.
- Fan sheets gently before placing in the feeder drawer.
- Do not guillotine trim sheets prior to imaging; this can cause misfeeds.
- Store product in original packaging between uses and away from concrete floors and walls.
- Keep product dry at all times.

**RELYCO**  
WILDLY RELIABLE
